ASAHI INDIA GLASS (AIS)

AIS SECURITYGLAS AND AIS SECURITYPLUS

AIS Securityglas and AIS Securityplus, both, offer a safe and secure option to introducing glass flooring in your interiors. Glass floors, ramps, stairs and footbridges create an illusion of space while also brightening up the room. Embedded textures provide an anti-skid surface that is scratch-proof which reduces the need for cleaning and easily hides any smudges or streaks. The PVB interlayer in the glass increases tolerance to greater loads, while enabling aesthetic, complex designs with minimal structural support.

ECOSENSE

Ecosense by Asahi India Glass Ltd. (AIS) offers a range of high-performance glasses which are ideal for skylights/canopies. The range includes: Enhance (Solar Control), Exceed (Solar Control Low-E) and Essence (Low-E) high-performance glasses. These glasses provide the benefit of reducing the heat gain in buildings due to their excellent energy saving properties, without compromising on the natural light coming inside. These energy-efficient glasses can be processed to provide safety and security benefits as well.
